Supplementary Features

- **Chapter Outlines** preview the broad topics that students will interact with throughout a chapter.
- **Chapter Introductions** provide background information and context to help students understand the content of each chapter.
- **Chapter Conclusion/Summaries** succinctly review the key content for student success in the course.
- **Key Terms Defined** supports student review of content and serves as a helpful study guide.
- **Works Consulted** and **Further Reading** present students with a comprehensive list of additional sources of information and web links to additional sources of information.
- **Endnotes** offer web links to sources of data used for tables, graphs, and maps in the chapter.

Expanded Coverage

The Galileo text provides **expanded coverage** of certain topics. Every teacher will decide how much coverage is possible within time constraints and with knowledge of the essential knowledge articulated in the Course and Exam Description. But if a teacher would wish to supplement the content about Rostow's Stages of Growth, for example, covered in AMSCO[®] on pages 479-481, the Galileo text would enrich coverage with more detailed explanations (pages 174-177).
